Victoria Tsukanova

Senior Front-End Developer · Montreal, Québec · Canadian Citizen
victoriatsukanova@gmail.com · 416 602-5706 · LinkedIn · Portfolio · GitHub

PROFILE

Senior Front-End Developer with 10 years of building React and TypeScript interfaces for ad-tech, analytics, and healthcare platforms. I architect design systems and component libraries that scale across products, then optimize for performance and security. I bridge design and engineering through close collaboration—turning business needs into intuitive interfaces that ship fast.

SKILLS & COMPETENCIES

- Design and develop shared component libraries and design systems used across multiple products
- Test and verify UI quality with unit, component, and end-to-end tests
- Integrate AI-assisted workflows into full-stack development
- Identify, investigate, and remedy security vulnerabilities in front-end and backend-for-frontend (BFF) code
- Proactive and observant: spots risks early and acts without being asked
- Autonomous and self-taught: learns new tools quickly and delivers independently
- Critical thinking: untangles unclear requirements and traces problems to their cause
- Collaborative: bridges design and engineering through close, clear communication

TECHNICAL KNOWLEDGE

React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Next.js, Redux Toolkit, Sass, Tailwind CSS, Material UI, Styled Components, REST APIs, GraphQL, Webpack, Vite, Babel, Git, Bitbucket, GitHub Actions, Jenkins, npm, ESLint, Vitest, React Testing Library, Playwright, Storybook, Figma, Jira, accessibility (WCAG/ARIA), responsive design, web performance optimization, cross-browser compatibility, CI/CD, Agile/Scrum, TDD, design systems, component libraries, data visualization, dashboards, code review, VS Code, AI-assisted development (Claude, Cursor, Copilot, ChatGPT)

PROFESSIONAL EXPERIENCE

PELMOREX, Montreal, remote **2017 — 2026**
Canadian weather and media company behind The Weather Network and MétéoMédia

UI/UX Developer

Built React and TypeScript interfaces for Pelmorex's ad-tech and analytics platforms, including a location intelligence dashboard that visualizes store traffic patterns for retail brands, and EngageFront, a Canadian programmatic advertising DSP.

- Built React dashboards visualizing retail foot traffic, visitor demographics, and competitive benchmarks for brands
- Modernized legacy interfaces through incremental migrations without disrupting live products
- Ensured application security and adherence to code quality standards
- Contributed to full-stack development by building Next.js API routes and server-side report exports

Achievements:

- Architected a shared React component library with multi-brand theming, extracting layout specs from Figma and implementing strict WCAG 2.1 AA accessibility standards to standardize UI and system design across EngageFront and the location intelligence platform
- Identified and prioritized critical vulnerabilities, including unprotected report exports, using AI tools, and advocated for remediating them before the scheduled pen test
- Introduced AI-assisted development workflow (GSD, Graphify) that greatly sped up delivery, then trained engineering teams on cost-efficient AI tool adoption

CARDEA HEALTH, Toronto, remote **2021**

Healthcare technology startup developing a cardiology dashboard

UI/UX Designer

Designed a cardiology dashboard from scratch for a health-tech startup, after being approached by a former CEO to lead the UI/UX design. Worked with a cardiologist, an ML engineer, and a software engineer to turn clinical needs into an MVP.

- Created wireframes in Figma, turning a cardiologist's initial vision into a complete visual UI walkthrough for the engineering team to review
- Collaborated with the cardiologist, ML engineer, and software engineer to design around clinical workflows and AI-generated insights
- Prioritized the MVP into must-haves, nice-to-haves, and a few delighters, balancing clinical needs with back-end feasibility and a fixed deadline

INVESTORS GROUP - IG Wealth Management , Toronto **2016 — 2017**

Canadian financial planning and wealth management company

Front-End Developer

Built production interfaces with HTML, CSS/SASS, and jQuery in a Lean UX environment, working directly with UI/UX designers

- Bridged the gap between visual design and technical interface implementation
- Translated designers' mockups into production-ready interfaces
- Contributed to rapid development iterations in a Lean UX environment
- Maintained the quality and consistency of reusable front-end components
- Resolved front-end issues in collaboration with a Salesforce developer

Interaction Designer

Owned UI deliverables, screen and micro-interaction layouts, style guides, and multi-screen view states

- Designed user interfaces and defined interactions for the company's digital platforms
- Produced UI deliverables, including screen layouts and micro-interactions
- Defined multi-screen display states to ensure a consistent user experience
- Collaborated with development teams to ensure faithful implementation of designs

Achievements:

- Converted from Interaction Designer to full-time Front-End Developer within 4 months, after impressing the Head of Engineering with my work

EDUCATION

Full-Stack Development **2019**
Juno College of Technology

College Graduate Certificate, Web Design **2015-2016**
Sheridan College

College Diploma, Visual and Creative Arts **2012-2014**
Sheridan College
